

*Cover Photo:*  
A golf course superintendent takes the lead in many projects around the golf course. As one example, organizing a complete reconstruction team, including the superintendent, builder, and architect, helps ensure a successful renovation project.

A cutworm emerging from its burrow to do its nocturnal damage. See page 6.

As the floodwaters receded from Fargo Country Club, the greens were washed as soon as possible to prevent the accumulation of silt in the upper root zone. See page 13.
