

*Cover Photo:
Agronomic practices such as
vertical mowing are instrumental
in providing good seed/soil
contact for establishment of
the overseeding grasses.*

*Scalped plugs can be avoided.
Technique can make the difference.
See page 6.*

*Getting everything you want is not going
to fit into the day-to-day fluctuations of
the golf course. See page 24.*

USGA® GREEN SECTION Record

1

Fairway Overseeding: Does It Make Dollars or Sense?

Objectively evaluating the impacts of fairway overseeding will determine if your course is ready to make the necessary sacrifices.

By Brian M. Maloy

6

Hole Placement

The art of cutting the hole.

By Keith A. Happ

8

Help Needed: Equipment Manager

Training candidates to fill open positions in the golf turf industry.

By Tinker Clift

10

Do You Know The Rules?

You should. Here's why.

By R. A. (Bob) Brame

11

Effective Use of Seawater Irrigation on Turfgrass

The second in a three-part series on water quality.

By R. R. Duncan, R. N. Carrow, and Mike Huck

18

Pond Aeration

Do not overlook this tool to manage and improve water quality in your ponds.

By Jim Skorulski

20

Sharing the Success of Good Stewardship

A successful effort to create environmental education opportunities right in a school's backyard.

By Chris Pekarek

22

The Green Keeper

By Edgar A. Guest

23

News Notes

24

Consistent Perfection

Golf course management in an "everything now" society.

By Bob Brame

26

Turf Twisters
